

GLB-002

REMARKS:

The Office Action required updating of the identification of the parent patent on the first page of the specification. Applicants have amended the specification accordingly.

The claims of the application were rejected under a non-statutory double patenting rejection over the parent patent, U.S. Patent No. 6,747,574. In response, Applicants are filing herewith a terminal disclaimer over the parent patent along with the requisite fee (via credit card payment). Withdrawal of the double patenting rejection is therefore respectfully requested.

No other matters being raised in the Office Action, this case is believed to be in condition for allowance. Such action is respectfully requested.

Applicants' undersigned attorney, who is also one of Applicants, can be reached at (614) 205-3241. All correspondence should be directed to the NEW address indicated below.

Respectfully submitted,

Dated: November 16, 2005
